

## **Doh-Me Material Test**

### **About the test**

Some variables that may have affected the results are:

- Each **Doh-me** was drawn/painted on an unprimed surface.
- That surface had not been washed with soap and water.
- Some **Doh-me's** may have had very mild sanded residue on them.
- 5 coats of Mod Podge Matte Clear Acrylic Sealer was applied to all.
- In newer tests surface has been washed with water and wiped down

### **About the sealer**

Mod Podge Matte Clear Acrylic Sealer can protect against heavy rubbing. Sometimes it can be scratched.

Scratching causes a noticeable difference from surface to coating.

Doh-me Material Tests

	X = YES	Blank = NO			
Brand	Category	Adheres to Surface	No Bleeding	No Smearing	Scratch Resistant
Prisma Wax Based Colored Pencil	Colored Pencil	x	x	x
